# Corporate Commitment Statement

---

Flexxform Designs is a family-owned business with a strong commitment to maintaining the highest possible standards in all that we do. We are always vigilant to be as fair as possible with our customers, employees, and our vendors. In subscribing to the highest possible level of customer satisfaction, we promise to:

- Build all products to the highest level of quality
- Stand behind our products and resolve issues without delay
- Maintain consistent lead times, and honor promised delivery dates to the best of our ability
- Maintain clear and open communication with all customers, employees, and vendors
- Maintain continuous product innovation and improvement
- Always provide friendly and expedient customer service
- Listen to the concerns and needs of our customers, employees, and vendors
- Keep in tune with the changing requirements in the market

We believe that our future success will be determined by our strong personal and corporate commitment to the standards listed above.

# Environmental Commitment

At Flexxform, sustainability is considered throughout the design, manufacturing, and lifecycle of our furniture.

As a manufacturer of soft seating, many of the raw materials used in our products are petroleum-based, including foam and certain upholstery components. We continue to work with suppliers and innovators to identify high-quality alternatives that offer improved environmental performance, including recyclable, biodegradable, and bio-based materials. Environmentally conscious upholstery options are also available, including silicone, cotton, flax, linen, and textiles made with recycled content. Please refer to our graded-in upholstery program or contact our customer service team for available options.

All Flexxform lounge seating is MAS Certified Green Plus™ certified, verifying that our products meet rigorous standards for low VOC emissions and indoor air quality performance through independent third-party testing of materials and components.

The wood used in the construction of our products is sourced from sustainably managed forests in Canada and the United States. We prioritize responsibly sourced materials, including FSC® and SFI® certified wood products.

Reducing waste is an important part of our manufacturing process. Wherever possible, excess materials are repurposed within product construction rather than discarded. For example, surplus upholstery materials may be reused as protective barriers between internal steel spring systems and foam components. This approach helps maximize material usage while contributing to product longevity and performance.

Our environmental efforts begin during the design and development phase of every product. Whether refining an existing collection or developing something new, we consider the environmental impact of material selection, manufacturing processes, product lifespan, and end-of-life recovery opportunities. Preference is given to renewable, recycled, recyclable, and responsibly sourced materials whenever feasible, while also considering ways to reduce the use of raw materials, water, and energy throughout production.

Flexxform also offers a reupholstery program for many of our products. Well-built lounge furniture can often be refreshed and extended through reupholstery rather than replacement, helping reduce unnecessary landfill waste and supporting a longer product lifecycle.

We remain committed to improving our practices and supporting a more sustainable future for the furniture industry through thoughtful design, responsible sourcing, and long-lasting product construction.
