# korvela

Korvela is a modular soft seating collection designed to support the natural flow of collaboration, conversation, and connection within modern public spaces. Its soft geometric forms create flexible layouts that feel welcoming, intentional, and adaptable across a wide range of environments, from education and workplace settings to libraries, lounges, and civic spaces. With sweeping curves, scalable configurations, and integrated functionality, Korvela helps shape spaces that feel comfortable, connected, and ready for the way people gather today.

## Design

Built around a modular geometry that balances curved and linear forms, Korvela introduces a softer architectural language to collaborative seating. The collection allows designers to create sweeping arcs, circular arrangements, serpentine pathways, and open gathering zones while maintaining visual cohesion across large-scale installations. Sculptural forms and varied backrest placement support both spatial flexibility and comfort, making Korvela a versatile solution for education, workplace, hospitality, and civic interiors.

## Performance

Enduraframe certified

---

550 lb weight rating for exceptional durability

---

All foam components are environmentally friendly and California TB117-2013 compliant

---

Reinforced seams keep Korvela's stitching strong and bedbug proof

---

Korvela's frame is constructed of solid American hardwood with 3/4" Canadian plywood components

---

All joins in the wood are glued and stapled to double the strength
